

LISCAD

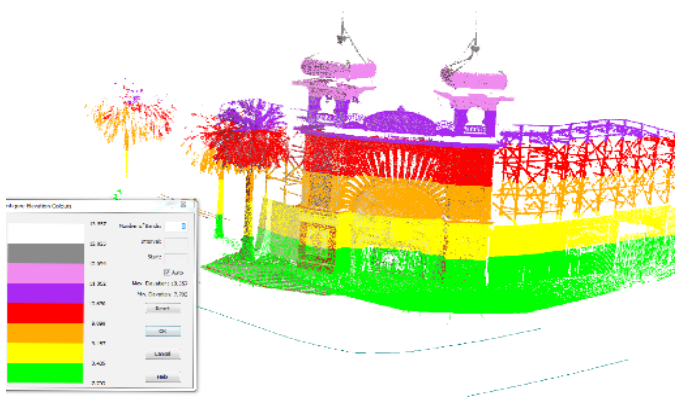

Power up performance, from field to finish

Complete field-to-finish, surveying and engineering software trusted by thousands of users worldwide.

Designed and developed by surveyors and engineers, LISCAD interfaces with all common surveying, engineering and CAD systems.

Integrated modules for seamless workflow

A comprehensive range of integrated modules allows users to work faster and more efficiently with a seamless workflow. The modular design offers the flexibility to purchase only what you need initially and to add modules with extra functionality as required.

KEY FEATURES

Rigorous geodetic computations, unlimited model size, traverse and least squares network adjustment, 2D and 3D transformations, volume computations, geo-referenced background images, 3D visualisation and profiles are just some of the things you can do with LISCAD.

The impressive engineering design capability allows easy generation of virtually any design, while Survey Live can be used for real-time surveying and set-out with Total Stations or GNSS equipment. In addition, Point Cloud can be used for importing, viewing, editing and digitisation of point cloud data.

The intuitive software is free to evaluate, easy-to-use, and is supported with comprehensive tutorials and technical support.

Free evaluation licences are available at www.listech.com.
